Proposal (Provide details of the request) _____

Location _____

Dimensions (if applicable) _____

Construction Material (if applicable) _____

Supplier _____ Contractor _____

Please attach a certificate of insurance from you contractor. Additionally, the homeowner is required to carry \$500,000 in Liability Insurance and to continue that level of coverage while the Electric Charger is in place. Please include a copy of the Homeowners Policy to confirm the required coverage. RPVIII Master Insurance Policy does not provide coverage for any damage to the unit owner's Electric Charging Station.

The plans and specifications showing the nature, kind, shape, height, materials and location of the charger must be attached to this application along with a copy of the License of the contractor and the required permits. If approved, I, the owner, agree to comply with this application and attached plans and specifications. I further agree that I, the owner, am responsible for any repair or maintenance of the charger or any additional repair or maintenance attributable to/caused by this addition to the existing unit structure. Any deviation from the specifications described here in will void the approval and could force the removal of the charger and the return of the unit to the previous state at the homeowner's expense.

Maintenance of the charger is the sole responsibility of the homeowner. When the unit sells this becomes the responsibility of the new owner. Therefore, this agreement should be passed to the new owner.
